Academy 2030

Partnerships for transformative knowledge and policy

Thomas Breu
Centre for Development and Environment (CDE),
University of Bern

23.11.2018, SUCAC Annual Conference 2018
Background and rationale

Knowledge for the **2030 Agenda**

> thorough collaborative **partnerships and policy dialogue**

> **Innovative multi-sectoral approaches** for sound and timely data, information, and knowledge sharing at the **land-health-conflict nexus**

> Focus on **capacity building**, enhancing societal dialogue, and nurturing **science-policy processes**
Partnership and nexus approach

CDE «Life on land»

HSR Platform development

WLRC (Ethiopia)

CETRAD (Kenya)

PH Bern Education / Outreach

Swisspeace «Peace, Justice & Strong Institutions»

TPH «Good Health & Well Being»

Resource conflicts

Ecohealth

2030 Agenda

Peace and health
Objectives

1. A partnership consortium with a nexus approach
2. Analysis of development debates, policy processes, and knowledge gaps
3. Expanding the data ecosystem for context analysis and SDG monitoring
4. Pilot of a multisectoral platform
5. Nurturing the science-policy interface
6. Training and capacity development
Novelty and Innovation

> **Data innovation:** Development of a showcase as an incubator for scaling out new knowledge within a multisectoral setting

> **Focus on trade-offs and co-benefits:** Testing of new approaches and processes in handling conceptual challenges inherent in the 2030 Agenda within the land-conflict-health nexus

> **Education and capacity building:** Integration of didactic and methodological innovations into training, capacity building, and platform design

> **Policy processes and networks:** Providing a basis for broad-based dialogue and policy processes in support of steering towards SDG achievements
