Katrin Sontag (NCCR On the Move, University of Basel)
18:00-19:00	Apéro Reception

Topic and Aim:

Like most European countries, Switzerland faces the challenge of integrating an increasing number of refugees into society and the labour market.

Swiss Higher Education Institutions have developed a number of initiatives aiming at the integration of *refugee researchers*. The recently founded Swiss section of Scholars at Risk (SAR-CH) brings the issue of integrating refugee researchers to the fore. Outside academia, interesting integration projects for refugee scholars such as Powercoders offer complementing pathways for highly qualified refugees. At European level, the EURAXESS initiative Science4Refugees has been launched by the European Commission in order to provide access to a European Research Community.

This EURAXESS conference combines an academic approach with practical examples to consider the effectiveness of specific initiatives and programmes for the integration of refugee researchers in Switzerland and beyond. It will be a unique opportunity to discuss different approaches and challenges amongst practitioners, scientists and representatives from public authorities.

Target audience:

EURAXESS Network Switzerland; Swiss section of Scholars at Risk; Research Offices, International Relations Offices and Diversity Units of the Swiss Higher Education Institutions; Swiss Academies; Swiss National Science Foundation; other interested parties of the Swiss Higher Education Institutions

Language: English

Participation fee: none

Organisation:

This conference is organised jointly by the International Relations Division of swissuniversities and the International Relations Office of the University of Zurich in the framework of the European initiative [EURAXESS](#). EURAXESS aims to facilitate the mobility of researchers and to improve their working conditions and career prospects.
