

How to get Platinum Open Access off the Ground

What is Platinum OA?

Publications are openly available to readers → as in Gold OA

.....

No fees have to be paid by authors → as in Green OA

The Spillover Model

Funds provided by research funding institutions, institutions of higher education and others (such as professional associations and libraries) jointly form an Open Access funding pool. The pool's resources are primarily used to finance Platinum OA. Funds that remain in the pool after all Platinum OA requests from a certain time period have been processed *spill over* to the funding of Gold OA works. The reason for the prioritization of Platinum OA is that it is the most effective and sustainable way to enhance accessibility of academic research.

Research funding institutions

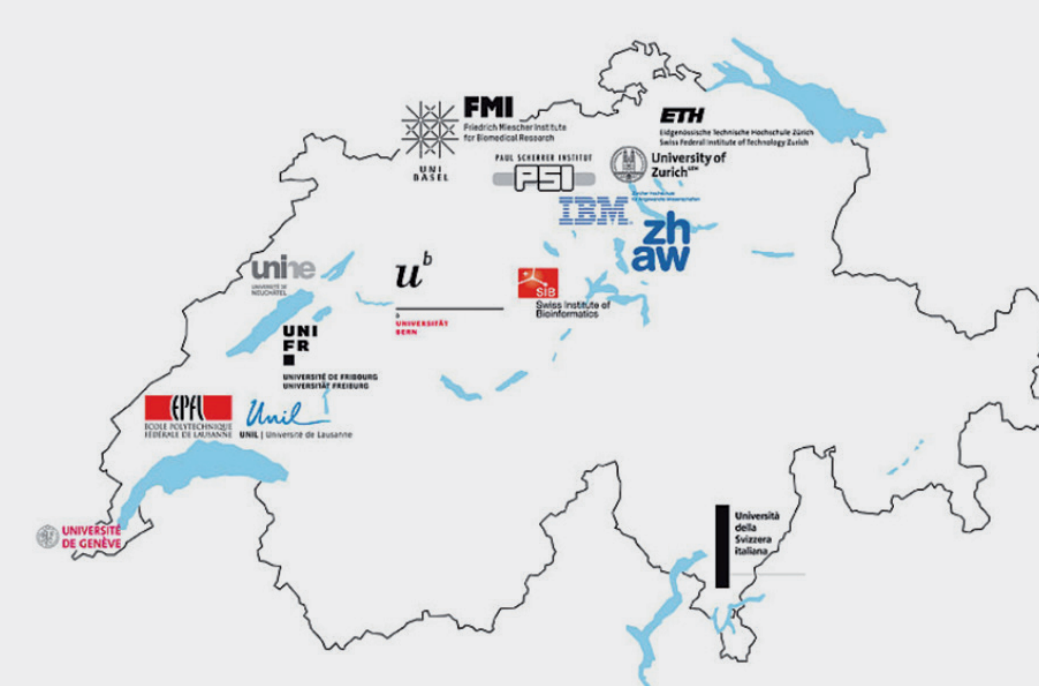

Schweizerische Eidgenossenschaft
Confédération suisse
Confederazione Svizzera
Confederaziun svizra

Innosuisse – Schweizerische Agentur
für Innovationsförderung

Swiss universities and institutions of higher education

swissuniversities

Others, e.g. professional associations or libraries

SJV Schweizerischer Juristenverein
SSJ Société suisse des juristes
SSG Società svizzera dei giuristi
